EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dustin R. DuFault on August 1, 2008.

The application has been amended as follows:

The following claims have been cancelled: 6, 9, 11, 13, 20, 22-23, 25, 27, 34 & 37-38.

Claim 14, line 18: "the rigid member." has been rewritten as —the rigid member; wherein said hinge members define an axis about which said stop pivots wherein said axis is horizontally offset from a platform edge such that said handle pivots to vertical in said locked and raised position.—

Claim 28: as been rewritten to read as follows:

--28. A hand-truck for supporting and transporting a load placed thereon, the hand-truck comprising:

a platform;

ground engageable wheels connected to the platform;

a unitary rigid handle connected to the platform, the handle positionable between a slidable position, a pivotal position and an extended locked position, the handle substantially perpendicular and fixedly securable to the platform

while in the extended locked position to prevent pivotal movement of the handle;

a channel member fixedly attached to an underside of the platform for receiving the handle, wherein the handle slidably disposes within the channel member while in the slidable position;

first and second spaced-apart hinge members positioned beyond an edge and fixedly connected to the platform, the handle slidably disposable between the hinge members;

first and second stop members attached proximate to a distal end of the handle;

a locking plate connected to the platform; and

a tongue member spaced-apart from the handle, the tongue member engageable with the locking plate, whereupon slidably positioning the handle towards the pivotal position, the first stop member engages the first hinge member and the second stop member engages the second hinge member, the first and second stop members defining an axis about which the handle is pivotal about the first and second hinge member, the axis is horizontally offset from the platform edge, whereby the handle is pivotal to fixedly secure the handle to the platform in the locked position by engaging the tongue member with the locking plate.

Claim 35, line 1: "The hand-truck of claim 34" has been rewritten as --The hand-truck of claim 28--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The cited prior art does not disclose a hand truck with a handle that slides into and out of a channel, said extended position provided by the combination of hinge and stops which provides a pivot axis horizontally offset from a platform edge allowing a handle to completely slide from a channel and pivot into a vertical position. As argued by Applicant in its May 27, 2008 brief, pages 13-27 none of the references provide for the combination of a channel with the vertical locking and moreover do not lend themselves to modification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GREGORY W. ADAMS whose telephone number is (571)272-8101. The examiner can normally be reached on M-Th, 8:30am-5pm.
